Soybean expeller

Characteristics:

It is a product obtained by a mechanical process of pressing the grain. Its physical form (presentation) is large particles of variable size and shape. Depending on the intensity of the process to extract oil, they can contain between 6% ethereal extract and 18% when it contains all the oil accompanied by the protein.

Nutritional contributions:

Crude protein: 42 %
Fat matter: 10.7 %

Determination	Wet	Dry	Method
Humedad y MS			
Humidity(%)	8.18		NIRS
Dry Material (%)	91.82		Calculated
